

# Brindabella Bushwalking Club Walks Register

## Read This Before You Begin

This Walks Register describes the majority of day walks undertaken by the Brindabella Bushwalking Club. It is not meant to be exhaustive; rather, it aims to provide guidance for leaders when preparing walk proposals. Grid References are shown as GR followed by 6 numbers; e.g., GR488712.

### There are three sections:

1. Index of Walks by Easy and Medium/Hard categories - starts on the following page.
2. Alphabetical list of Easy Walks, with descriptions.
3. Alphabetical list of Medium/Hard Walks, with descriptions.

Using the Index. Click on a walk name from the index to go to the description. To return to the Index at any time, select **Ctrl** and **Home** at the same time on your keyboard.

PDF Readers. A PDF Reader is a program that probably came with your computer (usually **Acrobat**), or it could be a program you've downloaded; e.g. Foxit, Nitro or Slim PDF. These are all slightly different, but do the job OK - annoyingly, they don't include a 'back' arrow.

However, all computer browsers can open PDFs and most do a better job than the programs mentioned above, with the bonus that you don't need a separate program taking up memory space. If you want to use your browser, just Google "opening pdf with Firefox (or Microsoft Edge, Chrome, etc)" and follow the simple instructions.

Search Box. In most PDF Readers you can open a search box in two ways:

1. Select **Ctrl** and **F** at the same time; or
2. Select the icon that looks like a **magnifying glass** - in Acrobat (popular PDF viewer) it's in the tool bar up near the **top left of every page**.

Finding a Walk. Open the Search Box and enter a word. The number of exact matches will be shown; click on the word to see the first. You can then click 'Next' to move to the next instance of that word, and so on. To return to the Index, close the Search box and then select **Ctrl** and **Home** together.

Finding a Grade of Walk. Open the search box and enter the grade; e.g. Grade 9. To return to the Index, close the Search box and then select **Ctrl** and **Home** together.

## Easy Walks - Ungraded

Pinnacle-Kama-Butters Bridge and return	Starting at the water tanks in Springvale Dve, we will walk over the Pinnacle Hill, through a new area excised from the Kama property and added to the Pinnacle Reserve, through South Kama Reserve into the Lower Molonglo Nature Reserve, and along the river to Butters Bridge (3 reserves and a new bridge!!). Although this is essentially an out-and-back walk, I have tried to find alternative routes for some of it so that we are not just retracing our steps. Butters Bridge is a new cycling/pedestrian bridge (which also carries a pipeline) over the Molonglo River behind Denman Prospect. If you haven't seen it - and walked across it - this is your chance. This is a long walk (~17 km), all on track, with NO difficult climbs. There are lots of gates but all of them should be open, or have a cut-out section to climb through. Scrivener Dam, Molonglo River Corridor, Barrer Circuit and the Arboretum	We will walk to the Zoo entrance and then peel off to the left of the Zoo to follow paths and trails comprising parts of the Bicentennial National Trail along the Molonglo River. We will pass under the Tuggeranong Expressway and continue on until a brief sighting of suburbs forces us back into and through the pine forests until we meet the "Barrer Circuit", with it's informational signs describing the extensive restoration of highly degraded land in this area from former grazing and forest uses, to wonderful meadows and emerging forest. We will stop in the shade of the pine forests for morning tea, and allow time for the more enthusiastic of our group to sprint up Barrer Hill for the extensive views. Our walk continues on bridle trails through pine forest to the southern entry of the Arboretum. We will pass by the rarely visited forests along Boundary Road to its junction with Quarry Rd which leads us uphill to near the Arboretum's Village Centre (toilets) for lunch. After lunch, we will proceed to the tunnel under the Tuggeranong Expressway and follow the small track on the west side of the Zoo to Scrivener Dam and then back to the cars. We follow the foot track along the Molonglo and Murrumbidgee Rivers to Uriarra Crossing and then continue along the fire trail onto the Stoney Creek Nature Reserve, where we will probably have an early lunch by the river. The trail basically follows the Murrumbidgee and has good views of the river. While this walk has recently been done, presently, there should be a good display of flowers along the route (albeit some (ob)noxious). Shepherds Lookout to Uriarra return	From the Shepherds Lookout carpark on Stockdill Drive we will walk to the lookout which is the most northerly viewing point in the ACT of the Murrumbidgee River. On the way to the crossing you will be able to see the junction of Molonglo and Murrumbidgee rivers. From the Molonglo River crossing we will head towards West Uriarra and then continue onto East Uriarra where we will have lunch. We will head back to the Molonglo River crossing and then retrace our steps back to the cars. This is a delightful walk, all on track with a tricky little rock scramble. <b>Meet at</b> the Shepherds Lookout carpark on Stockdill Drive at 10 am. Three Lookouts at Booroomba Rocks	There'll be a short car shuffle to leave cars at the Booroomba Rocks car park. The walk commences from the Honeysuckle Creek camp ground along the Australian Alps Walking Track (AAWT), to Booroomba Rocks car park for morning tea. After leaving here we follow another well-marked route across to the large south-western Booroomba slab to enjoy the views from its highest point. From there we return to the main track and go back down to the car park. If the forecast is for a hot day (above 27 deg), we will start the walk from Booroomba Rocks car park, which will mean the climbing (now only 300 m) will be done in the coolest part of the day and the distance reduced to 5 km. Two Sticks Road, Two Sticks Hill and Surrounding Circuit	This walk is entirely within Brindabella National Park. From Two Sticks Road we ascend Two Sticks Hill - which involves some light bush bashing in open trees/scrub for a short distance as we near the top of Two Sticks Hill. We then descend to Two Sticks Road before taking a series of footpads in virtually untouched forest/bush to descend towards Swamp Creek Fire trail. From this fire trail we head back, still on footpads, until we again reach Two Sticks Road where the cars are parked. Only a minor part of the walk involves walking along fire trails - because of this, it will still take some time to complete our circuit - the pace will not be fast. There are virtually no creeks to cross. Meet at Coal Drake Drive. Coming from Weston Creek area, Coal Drake Drive is on the left hand side of John Gorton Drive and on the right hand side of John Gorton Drive if coming from Coppins Crossing. Umbagog Walk and Axe Grinding Grooves	We will begin the walk by visiting and exploring the site of the Axe Grinding Grooves on the banks of Ginninderra Creek. Ginninderra Creek will be followed on its southern bank along a cycle path until we meet the stepping-stones which we will use to cross the creek. Still using a cycle path we proceed along the northern bank of Ginninderra Creek. Our walk on the cycle path is punctuated by the underpass under Florey Drive which signals the entry to Macgregor. Here some walkers can take a break while others continue. We will then walk on footpads until we reach a small bridge which allows us to cross the creek again. A pedestrian pathway leads us back to the underpass on Florey Drive, where we can collect any walkers who stopped at the bridge. Once we pass under Florey Drive we again meet a cycle path which we use to find our way back to the stepping stones. We again cross those stepping stones to the northern side of the creek and proceed back to the cars. This is a delightful circuit walk that promises lots of birds, interpretive signs [on seats], various varieties of trees and grasses and virtually no climbing. Meet. Umbagog District Park, parking area. You can access the parking area from Florey Drive. The parking area on the right hand side of Florey Drive is 1.1 kms north of the intersection of Southern Cross Drive and Florey Drive, near Kippax.	Street Map	6 km	30 m	Grade 4	0

Then down and up and alongside another smaller hill. Then up a somewhat rocky track to the first significant hill at 710m, and down and up again to the second significant hill, the one with the trig, at 713m. Stretching across 400 metres of lakeshore, it includes some of Australia's most beautiful student artworks, each naming and remembering one of the people who died. The ACT government supported the installation of the memorial, but the National Capital Authority were placed in an awkward position as it was strongly opposed by the government of the time. Permission was withheld for a year, and in an act of defiance, 2,000 Canberrans joined the 300 artists, church and school groups and in a special ceremony held the memorial up by hand for five minutes. The Memorial was finally constructed in October 2007.</i></p>	Street Map	4 km	10 m	Grade 4	0

Billy Billy Rocks - Ver 1	This is a relatively short walk in rough terrain to be taken at a leisurely pace with time to explore natural features. From Corin Dam Road (at GR739695) we take a rough track following the centre of the high ground to the south of Billy Billy Creek for an initially steepish climb to a couple of rock platforms. After morning tea at one of these, we cross the creek and go off track where some rock scrambling is needed to explore granite features and to get to the Billy Billy lookout. We then head off to another clump of rocks with interesting rock outcrops, overhangs and passages. The return route will be an intercepting route, designed to meet the inward track at some point. Gaiters, long pants and gloves recommended. <b>Meet</b> at K	Corin Dam	7 km	400 m	Grade 10	70 km

We walk on the true left side of Rendezvous Creek for about 4 km then climb north, steeply in places, through forest and boulders to a prominent rock outcrop sometimes called Orca Rock. If time permits we'll also go to Spot Height 1403. Return to Rendezvous Creek and follow the old fire trail back to the car park. Mostly off track with a mixture of grassland, moderate and thick scrub and rock scrambling. Part of the walk is exploratory. <b>Meet</b> at K	Rendezvous Creek	13 km	500 m	Grade 10	90 km

Orca Rock Circuit	Orca Rock is a spectacular granite formation above Rendezvous Creek. This walk goes from the Boboyan Road, near its crossing of Nursery Creek, towards then over the ridge between Nursery and Rendezvous creeks to approach Orca Rock from above. Return to the Boboyan Rd via Rendezvous Creek. Car shuffle of 4 km. Much of this area was burnt in the 2020 fire and there is significant regrowth. There are also rock outcrops to negotiate. <b>Meet at K.</b>	Rendezvous Creek	12 km	700 m	Grade 11	90 km
Orroral Hill Ridge	From the Orroral Tracking Station car park, we climb on the Granite Tors Walking Track up to the lunar laser ranging station for morning tea. We turn south-west and climb off-track almost to the top of Orroral Hill. This is a demanding climb with some steep sections, thick scrub and rock scrambling. We then turn north-west and follow the ridge to two massive boulders for lunch. Good views. Gloves, gaiters/long pants, eye protection and plenty of water recommended. We return the same way. <b>Meet</b> at K	Rendezvous Creek	10 km	700 m	Grade 11	100 km
Orroral Ridge to Orroral Valley	We'll walk from the Collimation Tower site, following the Link Track to Orroral Valley, walk along the valley for a couple of kms, then return the way we came. There is a steep climb of about 350 m along a section of the Link Track up from Orroral Valley. <b>Meet</b> at K	Corin Dam	15 km	350 m	Grade 8	90 km
Orroral Valley Hill 1339	From the Orroral Valley Car park we walk 5 km along the road to the NW, climbing 200m along the way. Near the source of Prairie Dog Ck, we leave the road and climb 200m through medium forest on a heading of roughly north until we reach the rocky knol marked as point 1339, where we hope to find views over the Valley. After lunch, we will descend steeply to the grassy valley and follow the Orroral River back to the car. Some rock scrambling is possible. <b>Meet</b> at K	Corin Dam	12 km	400 m	Grade 10	100 km
Parrot and Chalet Roads Brindabella Tops	We will drive to near Bendora Arboretum and drop a car, then drive to Aggie Gap. We walk to Mount Aggie for the view and back, then along Parrot and Chalet Roads to Bendora Arboretum for lunch, and then to the car. All on roads. Lovely recovered forest. Meet at W. Peaks above Rendezvous & Nursery Creeks	Starting along the Nursery Swamp Walking Trail we head west as we approach the swamp area. There are some Aboriginal paintings on the way. At the saddle above Rendezvous Creek we turn south to visit two peaks before descending towards Nursery Swamp. There are interesting and massive boulders up to and along the ridge. Some tall scrub and rough ground should be expected. The first peak provides good views of Rendezvous Creek and mountains opposite. From Nursery Swamp we return to the cars by the walking trail. <b>Meet at K</b>	Rendezvous Creek	13 km	600 m	Grade 11	90 km
Pheasant Hill / Boboyan Hill	A walk through pleasant forest, mostly off track. We start at the old Boboyan road carpark and walk along the road to the homestead ruins, then follow a watercourse to a viewpoint (1323 m altitude). The walk continues through forest with climbs to Boboyan and Pheasant Hills before returning to the cars. <b>Meet at K</b>	Yaouk	11 km	350 m	Grade 9	120 km
Pierces Creek - Sugarloaf Hill and Hardy Hill	We will park the cars at the junction of the Paddy's River Road and the Vanity's Crossing Road, 2.5km beyond Cotter Reserve. We follow a well-hidden but 'well used' track through pines until we see our first objective of the day, Sugarloaf Hill, which requires a short scramble off-track to reach the summit. We then descend to the Laurel Camp Rd and the East West Break for easy walking (you may see emus) to reach and cross Pipeline Road which gives us access to the Hardy Range Fire Trail and our second objective, Hardy Hill (lunch). We recommend walking poles (if you like them) for Hardy Hill, as the 4WD only track can be steep and shaly in places with loose gravel; the effort is well worth it for the unsurpassed views revealed on the way down! Our return to the cars follows the spectacular Razorback Track with broad surprising views in all directions and then Vanity's Crossing Road. Most of the walk is on 4WD and forest roads with the exception of Sugarloaf Hill, and mostly through regenerating open forest. <b>Meet at W</b>	Cotter Dam	11 km	485 m	Grade 8	25 km
Pierces Creek Falls	From the Pipeline Road we walk up onto Hardy Range and follow along the ridge to near the 1059m trig. Then go down spur to Pierces Creek and downstream to falls. After lunch go downstream a bit then back up across Hardy Range to Pipeline Road and back to cars. Scrubby in places. <b>Meet at W</b>	Cotter Dam, Tidbinbilla	12 km	675 m	Grade 11	50 km

Pierces Trig From Pierces Creek	From Pierces Creek Forest we ascend the spur from the east to the Tidbinbilla ridge. Then north to Pierces Trig for lunch. Return via Black Springs Mountain. This is a circular walk and we return to the cars along roads at the base of the range. Mostly on tracks. <b>Meet at W</b>	Tidbinbilla	15 Km	550 m	Grade 9	60 km
Pig Hill via North Ridge & Tinkers Ck FT Triangle	From Mountain Ck Road we ascend Pig Hill via an excellent bush track for morning tea with superb views towards the Murrumbidgee Valley and beyond to Canberra, then return via the Tinkers Creek Fire Trail, with a diversion to Blundells Weir via a side track for lunch to the sound of lyre birds. As the trails are steep in places, walking poles would be useful. It would also be useful for those with leather gloves to bring them to help clear the few metres of overgrown track down to the weir. <b>Meet at W</b>	Umburra	8 km	400 m	Grade 8	50 km
Pimple from Tidbinbilla Peak	climb steeply from the Mountain Creek car park up a good footpad to Snowy Corner, continuing less steeply to Mt Tidbinbilla. Thence via a scrubby spur leading out to the Pimple. Return by the same route through open bush to Snowy Corner and down the spur to the Lyrebird Trail. <b>Meet at K</b>	Tidbinbilla	13 km	900 m	Grade 12	70 km
Pinkwood Forest, Monga NP	The objective is to see some 100% shade forest very different from that around Canberra. Starting from Dasyurus Picnic area I propose to walk from the valley to the tops near Monga Mountain up beside a stream in plumwood forest (with hopefully no undergrowth, 280 m in 3 km), come down on minor forest roads. Then to do a circuit near Penance Grove (3km, 100m). <b>Meet at Q</b>	Monga	9 km	400 m	Grade 10	170 km
Pryors Hut from Corin Dam	From Corin Dam we climb the track to Stockyard Spur and then along the ridge to join the Mount Franklin Road beneath Little Ginini Mountain. We follow the road south to Pryors Hut for lunch. Return via the same route. None of the walk is off-track. Walking poles might be helpful for the descent. <b>Meet at K</b>	Corin Dam	16 km	880 m	Grade 10	90 km
Punchbowl Creek and Blythburn Cottage	The walk starts in the forest off the Corin Road and proceeds down an old trail alongside Punchbowl Creek to White Horse Flat and thence via open country to Blythburn Cottage. This was the home of a remarkable woman, Elizabeth McKeahnie, who lived there a century ago – hear her story. Return the same way. <b>Meet at K. N.B. Reedy Creek and Old Stone Walls	This is a short-ish walk which should result in an early finish. We start at Glendale Crossing and follow the Brandy Flat track until we take the turn to the north on the track beside Reedy Creek. After about 2.5 km along here, we turn west off-track and climb about 100 m to the saddle and pause to enjoy the views to the north, before heading south-west for our return. We will visit the mysterious old stone walls on the way and have lunch there. It is then about 2 km of steady descent to the cars through mostly open grassland. Gaiters and gloves are recommended. <b>Meet</b> at K	Michelago	9 km	520 m	Grade 9	85 km
Reedy Creek and Ridge	We park at the Glendale Depot car park and follow the Brandy Flat Hut footpad and fire trail to the Reedy Creek crossing. We walk along Reedy Creek till we meet another fire trail which follows the creek roughly north, climbing to a saddle. We then turn west, climbing off-track to hill point 1288 for lunch, then follow the ridge line south before descending to the footpad to return to the cars. Most of the scrub is burnt out which means off-track walking is easier - however you still need to watch your step around burnt spikes and rocks, so we will go fairly slowly. <b>Meet</b> at K	Michelago	8 km	400 m	Grade 8	85 km
Rendezvous Creek from Nursery Swamp	A steady climb on Nursery Swamp track to saddle, nearly level over the swamp and to the next saddle, then downhill to cross Rendezvous Creek. Walk parallel to the creek to a lunch spot beside refreshing cascades. Return via the same route. <b>Meet</b> at K	Rendezvous Creek	12 km	400 m	Grade 8	85 km
Rendezvous Creek Ridge	Starting from the Rendezvous Creek carpark on Boboyan Road we go off-track, climbing a spur to peak 1342. We then walk along the ridge overlooking the Rendezvous Creek valley, possibly as far as peak 1403. Lunch will be on a rocky outcrop with views. We then descend very steeply to the valley and return along the valley to the cars. This walk is off-track and challenging - expect thick scrub plus lots of climbing over boulders and fallen trees. Gloves and gaiters/long pants recommended. <b>Meet</b> at K. Abv RV Ck0603.kml	Rendezvous Creek	11 km	500 m	Grade 11	90 km

Rob Roy Nature Reserve North	This walk explores hills and gullies at the northern end of Rob Roy Nature Reserve. From the reservoir above Banks we climb steeply, to reach Hill 887 (GR 927 725). We continue to the eastern border of the reserve, follow the border southwards and climb a spur to the main Rob Roy track. We descend through gullies to the starting point. Mostly off-track through open woodland and former pasture but with some difficult scrub in the gullies. Meeting point: Jane Sutherland St, Conder. Turn from Tom Roberts Ave into Jane Sutherland St and park just after the roundabout.	Tuggeranong	9 km	550 m	Grade 9	0
Rock Outcrop west of Billy Billy	The walk goes from the Corin Dam Road, passes Bogong Rocks and continues roughly westwards to a rock outcrop west of Billy Billy Rocks, which we'll explore. The walk is completely off-track, across rough terrain and partly exploratory. The area was burnt in the 2020 fire. Apart from rock outcrops to negotiate patches of significant regrowth may be encountered. <b>Meet</b> at K	Coruin Dam	11 km	500 m	Grade 10	70 km
Rocks above Nursery Swamp	From the Nursery Swamp car park, follow the track to the saddle and then down to the end of the track at Nursery Swamp. Cross the swamp (garbages recommended to keep boots dry if there has been recent rain) and then climb off track approximately north up through thick scrub to a rock slab with lovely views across to Nursery Hill and beyond. A steep descent from the south east end of the slab to return to the track and back to the cars. <b>Meet</b> at K	Rendezvous Creek	13 km	400 m	Grade 9	100 km
Rocks Below Square Rock	This is a relatively short walk, with plenty of rock formations to investigate. We walk up the track to Square Rock for morning tea. From here, we circumnavigate Square Rock in an anti-clockwise direction, checking nooks and crannies as we go. After nearly getting back to the track, we head west and south from one rocky feature to the next. The going is very rough under foot and there are extensive thickets of scrub between many of the rocky outcrops. We'll find a spot for lunch at one of the features. Eventually, we join the Orroral Lookout track very near the lookout and head back to the cars. Long pants, gaiters and gloves are recommended. <b>Meet</b> at K	Corin Dam	12 km	550 m	Grade 10	70 km
Rocky Pic	The walk, which starts on Harolds Cross Road east of Captains Flat, includes parts of Tallaganda State Forest and NP on either side of the Great Dividing Range. It is mostly off-track through a variety of forest which wasn't burnt in the 2019-20 fires. There's a short rock scramble near Rocky Pic (which has an altitude of 1,255 m). Several creek crossings and a few steep sections. Suitable for experienced off-track walkers. Gaiters and scrub gloves recommended. Drive includes about 15 km of unsealed road. Rocky Features near Square Rock Car Park	We park at the Square Rock car park and follow Smokers Loop Trail for about 1 km. Next, we walk south to the first major rocky outcrop. We then zig-zag a bit, visiting various interesting rock formations along the way. After lunch, there is 1,6 km of descent through the bush until we reach the Square Rock track, which we follow back to the car park. Some of the rocky outcrops are magnificent and the battle to reach them is worth it. Long pants, gaiters and gloves are highly recommended. <b>Meet</b> at K	Corin Dam	7 km	350 m	Grade 10	70 km
Rowleys Hut Site	From the Rendezvous Creek car park (northern side of Gudgenby River) we will follow the track to Rowleys Hut site where we will probably have morning tea. From there we head in a north westerly direction to an area of interest about 1.5 km from Rowleys Hut site. The last 300 metres or so is through bush but it is not particularly scrubby. We will return much the same way. The walk is through gently undulating country except for a minor climb of less than 100 metres to the lunch spot. <b>Meet</b> at K	Rendezvous Creek	14 km	150 m	Grade 8	90 km
Sams Creek and Gudgenby Saddle	From the Boboyan (Yankee Hat) car park we follow the Old Boboyan Road south to Naas Creek. We turn NW to follow Sams Creek Fire Trail along the Naas valley, turning NE to cross the saddle just south of Mount Gudgenby, an return along Bogong Creek. About 3km is off-track & there is a lot of fallen timber across Sam's Creek. <b>Meet</b> at K	Yaouk	23 km	350 m	Grade 11	100 km
Sassafras Mountain via Maxwell's Ladder	We commence from the car parking area at the locked gate on Meangora Road near Nerriga and proceed along the Redgrounds Track, paddling across the Endrick River on the way there and back. From the Redgrounds Track we walk off-track to the base of the cliffs lining the western part of Sassafras Mountain overlooking Gilberts Gap. We contour north east and then north along the bottom of the cliffs to Maxwell's Ladder and the rock scramble through the cliffs to the summit plateau. Gaiters and gloves are highly recommended. We go northwards along the plateau and then descend through the west-facing cliffs and back to the Track. The long drive will place some pressure on our walking speed. <b>Meet</b> at S	Nerriga, Endrick	13 km	500 m	Grade 10	220 km

Scar on Mt Tennent	Just a short drive and relatively short walk today. We walk from the Namadgi National Park Visitor Centre and head to the bottom of the creek that is the 'scar' on Mt Tennent. We then go up the creek bed to the top, and angle over to the fire tower. This is very steep in parts, with the final 450 metres of climb occurring in less than 1000 metres horizontally on the map. This walk has its challenges, with loose or slippery surfaces in places, and we may have to get out of the creek bed and into the scratchy scrub if the surface is wet/frosty or if you suffer from vertigo. Return will be via the fire trail and usual track down the mountain. <b>Meet</b> at K	Williamsdale	11 km	800 m	Grade 12	40 km
Sentry Box	From the Yaouk Road near Bradleys Creek homestead we go across Bradleys Creek and up a ridge to top of Sentry Box Mountain and then on to Sentry Box Rock. Return via a ridge back to road and thence to cars. <b>Meet</b> at K	Yaouk	10 km	700 m	Grade 10	180 km
Sentry Box Rock	A lovely circular walk in the far south of the ACT with stunning views. All off track. Initially across grasslands, then a steep climb through reasonably open forest and over granite slabs and through snow gums to Sentry Box Rock for lunch. After lunch, south along the summit ridge, involving some patches of thick scrub to a saddle and a long, steep, loose and rough descent before a walk to and over another saddle to rejoin our outward route. Walkers need to be fit. Bring gaiters, gloves and warm clothes. <b>Meet</b> at K	Yaouk	12 km	600 m	Grade 11	180 km
Serenity Rocks, Tallaganda	The walk starts near the junction of Lowden Road and Coxes Creek Road about 8 km from Rossi. We walk along the Lowden Trig Fire trail, then along the foot track to Serenity Rocks. The return is also on foot track and fire trails. Lovely forest and creeks, great rocks and views. There is one short but steep descent to a creek crossing and then a short steep ascent. <b>Meet</b> at Q	Bombay, Bendoura	13 km	450 m	Grade 9	100 km
Shanahans Creek Falls	This walk is mainly on fire trails, or in wide valleys of open forest, grasslands, with no steep or long climbs. Starting near Mount Clear campsite we follow the Naas Valley fire trail to the saddle south of Horse Gully Hut, follow the ridge to the fording place on Naas River, then go back via Shanahans Creek Falls. <b>Meet</b> at K	Colinton	15 km	450 m	Grade 10	140 km

Sherwood Homestead Autumn Colours	We leave cars on Mountain Creek Road and walk to Sherwood Homestead site for morning tea and Blue Range Hut for lunch. The return is via Spot Height 755 and Mt Dowling. The walk mostly follows forestry roads with possible short sections on rougher tracks, avoiding blackberries. Highlights are (hopefully) autumn colours at the Homestead site, internment camp history at Blue Range Hut, and views from the two hills. <b>Meet</b> at W	Cotter Dam	16 km	400 m	Grade 8	50 km
Snowy Flat Cascades via Stockyard Spur	From Corin Dam we take the well-known track up Stockyard Spur. Initially this is steep, climbing 500m in 2 km (but we will go at our own pace) then undulating. After the Grandstand lookout we leave the track and go a short distance off track to the Cascades at the head of Snowy Flat Creek. We return much the same way back to the Stockyard Spur Track and so back to the cars. If the weather is unkind we will give the Cascades a miss and have lunch inside Pryors Hut. <b>Meet</b> at K	Corin Dam	16 km	1000 m	Grade 10	80 km

South Woden Circuit	A loop walk covering the reserves of Isaacs, Wanniasa and Farrer Ridges. We follow nature reserves through Mawson, Swinger Hill and O'Malley, climbing up to the Isaacs Ridge Reserve. We contour round through light forest to the old riding school, continuing on old tracks and grassland on the eastern side of the Isaacs Ridge. If we can find a thistle-free route, we'll climb onto the ridge and south through light forest, descending to the tunnel under Long Gully Road and into the Wanniasa Hills Reserve. We climb Mt Wanniasa, descend to the tunnel under Erindale Drive and climb to the Farrer Ridge. After following the ridge we descend to the central spine of Farrer and follow the path back to Southlands. We will be off-track as much as possible, through open woodland/grassland, rocky in places. <b>Meet:</b> The southern carpark of Southlands Shopping Centre (Mawson) adjacent to the tennis courts (near the Woolworths petrol station in Mawson Place, Mawson). Spinnaker Circuit via Orroral Ridge Rd	From the Honeysuckle Creek camping ground we walk up the Orroral Ridge Road and then a short distance along the Link Track (which goes to the Orroral Valley). We then go off track, roughly north-east along the ridge to Spinnaker Rock where we will have lunch. There is a steep descent to the valley and then on track back to the starting point for an early finish. Some thick scrub expected. <b>Meet</b> at K	Corin Dam	7 km	300 m	Grade 8	70 km
Split Rock	We walk briskly from the Orroral Tracking Station car park along the Cotter Hut Road and Australian Alps Walking Track to Cotter Gap. Then the hard part starts. After lunch with a view we scramble back down to Cotter Gap and return to the cars. <b>Meet</b> at K	Rendezvous Creek, Corin Dam	19 km	600 m	Grade 11	100 km
Spot Height 1409	SH 1409 is an isolated peak north of the Corin Dam Rd. Last summer's bushfire has made it temporarily more accessible. The walk, which is all off-track, starts on the Corin Dam Rd, passes Bogong Rocks and continues west on an indistinct ridge to the peak. The return route will be roughly the same as the outward route. <b>Meet</b> at K	Corin Dam	12 km	700 m	Grade 10	70 km
Square Rock via Smokers Loop	We start on the Smokers Loop track through the bush from the Corin Hub carpark on Corin Dam Road up to Smokers Trail. Stockyard Spur from Corin Dam	This walk is for those who have always wanted to walk up Stockyard Spur but weren't sure they could make it. Don't let the 500 m in 2 km put you off. Do it at your own pace. From Corin Dam we climb the track to a nice morning tea rest spot half way up. Lunch will be in the forest a bit beyond the helipad site. Return via the same route. Stoney Creek Reserve North of Mt Stromlo	From a northern entrance of the Mt Stromlo Reserve we walk a short distance through the reserve, and then explore the Stoney Creek reserve area and the margins of the Murrumbidgee River corridor. The best parts of the walks are looking at the water gushing down Stoney Creek gorge, visiting the exit of Stoney Creek into the Murrumbidgee River, and walking along the top of the escarpment over the Murrumbidgee River. The walk is mainly easy-going off-track on ex grazing land, but it is a bit rougher going down to the river and back up, and we have to cross a few smallish streams. Meet at a northern entrance of Mount Stromlo (opposite the driveways of Spring Valley and Piney Creek farms) on Uriarra Road, 2.2 km NW of Uriarra Rd - Coaldrake Avenue roundabout.	Canberra, Cotter Dam	13 km	300 m	Grade 10 0	
Stony Creek Nature Reserve	We start from the locked gate about 1km along Brindabella Road above the Cotter Dam. We follow a spur down to the Murrumbidgee River and will follow the course of the river downstream. We will go as far as possible by lunchtime and return by the same spur and then down the track to the Cotter camping area. We should be able to swim at several places. There is a short car shuffle. <b>Meet</b> at W	Cotter	10 km	250 m	Grade 8	20 km
Sugarloaf Creek Swims	From the Misty Mountain Fire Trail bridge we will walk up Sugarloaf Creek on the terraces and river bed, mainly in shade, with swimming in the many pools. Return by a 220 m climb up a spur to the road and walk back along the road. The walk is graded medium because of the uneven footing along the rocky creek bed. Beautiful creek and rainforest margins. <b>Meet</b> at Q	Currawan, Monga	10 km	270 m	Grade 9	240 km
Sugarloaf Creek Tributary, above Falls, Monga NP	Rainforest walking. The idea is to see the lower 2/3 of the tributary of Sugarloaf Creek, the one below Pooh Corner on Clyde Mountain road. We will leave cars on the Misty Mountain Fire trail at 708598, go 600 m North, 200 m down to the mouth of the tributary, up the beautiful falls and plunge pools, then 3-4 km up a valley in rainforest to the first big falls. We then climb out 150 m up 300 m SE to the ridge and go directly back to the cars in open Eucalyptus forest, partly following the old fire trail. We will be mainly out of riverbed. You will need either trousers or high gaiters. <b>Meet</b> at Q	Monga	8 km	500 m	Grade 10	225 km

Tallaganda - Butmaroo Area	We drive along Butmaroo Road past the homestead and take the right track at the first fork. We park at the first copse of trees. The National Park is only a short distance to the south. We roughly follow the boundary east and south until we meet the North Black Range Fire Trail. Near Wombat Flat we follow a track to Mulloon Creek. After about 1 km downstream we turn west and return to the cars. <b>Meet</b> at Q	Manar	12 km	250 m	Grade 8	85 km
Temple of Doom	Walk from Nursery Swamp fire trail car park, take the Nursery Swamp track, but before reaching Nursery Creek we leave the track and climb steeply through scrub to the summit of the hill to our north where we hope to find the Temple of Doom ( <b>remember to bring torches</b> ). From there we descend to a special rock overhang and then pick up a foot track which takes us back to the Nursery Swamp Track. <b>Meet</b> at K	Rendezvous Creek	11 km	500 m	Grade 9	80 km
Tennent Homestead	A short morning walk to visit the remains of the Tennent Homestead and woolshed burnt in the 2003 fires - the rammed earth walls are rapidly deteriorating and better seen sooner than later. Starting from Namadgi Visitor Information Centre we take the Australian Alps Walking Track until it turns left at an arrow. Here we turn to the right taking a faint footpad north, following it to cross a small watercourse. On reaching a second stream we drop down it to meet the powerlines. From here it is a straightforward walk to the homestead. Some scrub - possibly dense scrub if we lose the footpad - so be prepared in long trousers, long-sleeved shirts, gaiters and gloves. The walk is for history buffs and those who don't mind a little scrub to reach a new destination. Meet at K	Williamsdale	6 km	180 m	Grade 8	40 km
Tennent Homestead and Peak 1101	This is a circular walk from the Namadgi Visitors Centre. We start up the Australian Alps Walking Track and ascend to the ridge north of Mt Tennent for morning break at the T junction at 845 645 (not shown on maps due to the new track alignment). We proceed north along the ridge line by track and mostly open bush to peak 1101 for some restricted views. For really superb views over the valley towards Tharwa and Rob Roy we find a rocky outcrop just east of peak 1108 through thicker bush for lunch. To get to the ruins of Tennent Homestead at 858 666 we will follow the least steep descent through variable bush. The Onion	The walk starts from the Tinderry Road and follows the Round Flat Fire Trail for a couple of kilometres before a steep climb to a rocky outcrop to the east of the range. We then walk towards the south-west for a further 2 km through scrub, which is thick in places, followed by a rock scramble to the top of The Onion. The return route is mostly south-east back to the fire trail, reaching it about one kilometre from the cars. This gives us access to the underpass at William Hovell Drive allowing us to cross into Kama Reserve and do the River Walk loop there. We reverse the crossing via the underpass and Kama property to end the day with a climb back to the cars along a track at the eastern end of the Pinnacle Reserve. We have to climb a solid gate (twice) to access the underpass. <b>Meet</b> at the parking area at the intersection of Springvale Drive and De Salis Street Hawker	Street	13 km	100 m	Grade 8	0
